

ART/MAKER CLUB

Our Art/Maker Club is a place for children to grow their imaginations, creativity, and problem solving skills. Each week we will practice observation, recording our observations, experimenting with different mediums, and creating. Each club day will include at least a half hour spent in our “maker” stations with open ended exploration and invention. This is a great fit for children who are naturally curious, creative, and like to tinker. It is also a chance to grow those skills in children who are more structured. This club will be offered on Tuesday afternoons from 1-3pm. The cost will be \$70 per month for those not already signed up to stay for extended day and will include stay ‘n play time for lunch.
